What's new at Merkland Tank?

We have some exciting updates to share on recent projects, equipment, people and services - read on to learn more and do please get in touch to find out how we can help with your next project...

RECENT PROJECTS

Throughout February, we have been supporting one of Scotland's largest Waste Water Treatment Works (WWTW) with the removal of sludge and grit build up from their process tanks. It was definitely a job for our high performance CycloVac and our expert confined space/emergency rescue operatives who successfully removed over 300 tonnes of waste!

DEVELOPING FROM WITHIN

Investing in our employees' development is an important part of our success at Merkland Tank. So, we are delighted that Scott Smith has successfully completed his 'Level 3 Modern Apprenticeship in Installation and Commissioning'. Congratulations Scott, the hard work has paid off!

SUPPORTING OUR COMMUNITY

We were pleased to offer our services without charge to Dial-a-Journey, an Order of Malta charitable organisation who provide transport services across Scotland for people with mobility problems. We stepped in to clean their Interceptors and carry out essential Fuel Tank Maintenance to keep this invaluable local service running smoothly.

SPOTLIGHT ON... INTERCEPTOR MAINTENANCE

With Spring on the horizon, it's an ideal time to make sure your interceptors are checked and cleaned. If left unchecked, blockages caused by silt and other debris build up can leave you susceptible to flooding, overfill and environmental pollution - and the possibility of much heavier costs to fix! Don't worry though, Merkland Tank are here to help...
