What's new at Merkland Tank?

We have some exciting updates to share on recent projects, equipment, people and services - read on to learn more and do please get in touch to find out how we can help with your next project...

AUTUMN OUTAGE SUPPORT

Merkland Tank were pleased to recently complete the timely management of specialist industrial cleaning during a planned outage for one of our highly valued customers.

Due to the tight timescales involved, the project required detailed advance planning plus significant onsite project management from our skilled team to oversee three concurrent jobs.

Our team worked efficiently and safely to ensure the cleaning of all Carbon Vessels, Sumps, Drains and Effluent Tanks were completed on time and to the highest of standards for our satisfied customer.

SHARPENING OUR SKILLS

Well done to one of our Drivers, Chris Stewart who successfully completed his 5-Day Driver CPC Course! Regular newsletter readers will know that ongoing skills training is a big priority here at Merkland. Chris' latest training covers key areas such as health & safety awareness, efficient driving and driver hours, to expand on his existing knowledge and continue to stay safe on the road. Good job Chris!

SPOTLIGHT ON... FUEL TANK DECOMMISSIONING

Earlier this year, Merkland Tank successfully carried out decommissioning of four fuel tanks and the heating system at the L.S. Starrett Company manufacturing facility in Jedburgh, Scotland, in preparation for demolition of the site.

Over the 4-week project, our experienced engineers and confined space and rescue operatives safely drained and cleaned 1 no. 55,000 litre HFO Tank (containing 38,000 litres residual oil), 1 no. 20,000 litre Methanol Tank, and 2 no. LPG tanks, alongside a full drain down of the plant's heating system.
