What's new at Merkland Tank?

We have some exciting updates to share on recent projects, equipment, people and services - read on to learn more and do please get in touch to find out how we can help with your next project...

SPOTLIGHT ON...BESPOKE INDUSTRIAL CLEANING

Merkland offers a suite of specialised cleaning services tailored to meet the diverse needs of industrial sites.

From essential maintenance services for drains and sewers to maintaining critical infrastructure like boilers and heat exchangers, our team brings expertise in high-pressure water jetting and advanced diagnostics.

Recently, our high-performance Muller Recycler was used alongside our Artic Vacuum Tanker for planned maintenance on a critical main sewer line in Glasgow.

Due to the location of the work, the project required temporary traffic management to be put in place for a single lane closure and contraflow system to minimise disruption and ensure worker and public safety.

WAXING LYRICAL ABOUT MERKLAND'S FULL SERVICE SOLUTIONS

We were recently tasked with decommissioning and removing four Molten Wax Tanks and Site Boiler for our packaging manufacturing customer.

Our team carried out a full internal clean of the wax tanks in preparation for dismantling on-site, removal and safe disposal.

We also removed the redundant site boiler from its present location within a 20ft shipping container, with both the boiler and container then removed from site and disposed of in a safe and compliant manner, as per current regulations.

Due to the size of the tanks, specialist access and lifting equipment was required to be used in tandem to safely remove and load the tanks onto our own transport.

Merkland Tank excels in the dismantling and secure removal of redundant tanks and associated pipework, specialising in challenging environments like fuel depots, oil refineries and active industrial areas.

SAFECONTRACTOR ACCREDITATION SUCCESS!

We are delighted to be awarded renewal of our SafeContractor accreditation for another year!

The accreditation, one of many held by Merkland Tank, showcases our ongoing commitment to health and safety compliance, and demonstrates we are a safe and responsible company.

We are extremely proud of our health, safety and environmental credentials, which also include ISO 9001/14001/45001, Constructionline Gold and Achilles Silver Plus.
