What's new at Merkland Tank?

We have some exciting updates to share on recent projects, equipment, people and services - read on to learn more and do please get in touch to find out how we can help with your next project...

SPOTLIGHT ON...SAFELY HANDLING YOUR BULK WASTE

We're experts when it comes to the safe and efficient removal, transportation and disposal of your liquid, dry, hazardous and non-hazardous industrial waste!

Whether it's waste oils and fuels, sewage and grey water, or flour and grains, we have some of the highest-performing vacuum tankers and jetting vehicles in the industry (including our new state-of-the-art, high-suction **CycloVac Pro Skytipper** and our advanced, powerful **Müller Recycler**), that can deliver reliable and environmentally-responsible waste services across all sectors.

Our highly experienced, fully-trained tanker drivers adhere to the strict compliance and safety standards that our customers expect from Merkland Tank, and we're here to provide both planned and reactive waste tanker services to keep your site running smoothly.

As a SEPA-registered waste carrier, we work with a trusted network of fully-licensed waste treatment and disposal sites to ensure all waste is responsibly handled and processed to meet current environmental regulations and give you complete peace-of-mind.

Whatever your bulk waste, trust Merkland Tank to handle it.

MÜLLER MAKES LIGHT WORK OF HEAVY SLUDGE REMOVAL!

We recently successfully removed over 100 tonnes of sludge from our wastewater client's thickener tank - thanks to the powerful suction capabilities of our Müller F160 Recycler.

Our team were required to remove the semi-solid sludge, a by-product of the wastewater treatment process, from the 20m diameter tank before pressure washing the interior to remove any residual waste. The sludge was then reprocessed onsite.

The work was part of a planned maintenance programme to allow third-party inspection and overhaul of the tank.

Our specially-trained emergency rescue team, led by Merkland's Confined Space Operator Frank McGartland, provided ERT support across the 3-week project, carrying out continuous air monitoring and managing the ventilation system for the team of inspectors on site. A great effort from everyone involved!

OUR PEOPLE: MAKING MOVES AT MERKLAND

Investing in our people is an important value here at Merkland Tank and we love to see our staff progress and develop within the business.

So we're delighted to see one of our long-serving employees, Alan Hutton, move into a new hybrid role as Transport & Plant Coordinator, tasked with looking after our extensive fleet. Don't worry though, he's not hanging up his boots just yet - he'll still be onsite driving tankers and carrying out driver training as required. Congratulations on your new role Alan!
